OBJECTIVES

This multidisciplinary conference is intended for physicians, physician assistants, nurse practitioners, nurses, nurse anesthetists, pre-hospital providers, allied health professionals and professional students.

CONFERENCE OBJECTIVES:

- Review the history of endovascular therapies for hemostasis following trauma.
- Discuss the advantages of a hybrid operating room during the resuscitation and management of a trauma patient.
- Discuss possible alternative interventions in caring for a delirious older adult.
- Identify how the international community can help develop countries.
- Describe the assessment and management of major trauma in a pregnant patient.
- Discuss the obstacles faced in the pre-hospital care of the injured person.
- Define the distinction between primary concussion and post-concussion syndrome.
- Identify how social media is influencing healthcare.
