

ACADEMIC MEDICINE  
JOURNAL OF THE ASSOCIATION OF AMERICAN MEDICAL COLLEGES  
**Authorship Responsibility, Disclosure, and Assignment of Copyright Form**

*Each author* must read and sign the statements on **Authorship Responsibility and Criteria** and either **Copyright Transfer** or **Federal Employment**.

Author Name \_\_\_\_\_

Manuscript Title \_\_\_\_\_

Name of Corresponding Author or Manuscript Tracking # \_\_\_\_\_

**AUTHORSHIP RESPONSIBILITY AND CRITERIA**

The author warrants that

- a. the article is his or her original work, not published elsewhere in whole or in part (except in abstract form), and any other publications that might appear to be a prior or concurrent publication of this original work have been revealed to the Editor of *Academic Medicine*;
- b. the article is not concurrently under consideration by another publication;
- c. any material that is not original was taken openly from other sources, full references have been given to the author(s) and copyright holder(s) (authors and publishers) of these sources, and written permission has been obtained from the copyright holders to reprint any tables or figures that are copyrighted elsewhere;
- d. he or she has contributed substantially to (1) conception and design, or acquisition of data, or analysis and interpretation of data, (2) drafting the article or revising it critically for important intellectual content, and (3) final approval of the version to be published. Authors must meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group, alone, does not justify authorship Each author should have participated sufficiently in the work to take public responsibility for appropriate portions of the content;
- e. he or she has been advised that *Academic Medicine* may share this article with a third-party author for the purpose of soliciting a commentary to accompany the author's work.
- f. this agreement includes all submitted written material as well as any supplementary digital material including but not limited to audio, video, and other data files whose formats may vary;
- g. for studies or evaluations involving human participants (including students, residents, and faculty), details are provided of ethical approval for the research in the manuscript, including but not limited to the name of the approving committee (e.g., Institutional Review Board) and the name(s) of the institution at which approval was granted. Authors who do not have access to a formal ethical approval process have provided information in the manuscript about the appropriate and ethical treatment of human

- h. participants as described in US Code of Federal Regulations, Title 45, Part 46; and all intellectual contributions, technical help, financial or material support, and financial or other relationships that may constitute or lead to a conflict of interest have been acknowledged or disclosed in the article;

**COPYRIGHT TRANSFER**

In consideration of publishing this article, the author undersigned hereby transfers, assigns, or otherwise conveys all copyright ownership to the Association of American Medical Colleges (AAMC). By this transfer, the article becomes the property of the AAMC and may not be published elsewhere without written permission from the AAMC. This transfer of copyright also implies transfer of rights for printed, electronic, microfilm, and facsimile publication. The author(s) will receive no royalty or other monetary compensation for transferring the copyright of the article to the AAMC.

The AAMC, in turn, grants each author the right to republish the article, without paying royalties to the AAMC, in any book of which he or she is the author or editor, subject to the express conditions that (a) the author notify *Academic Medicine* in advance in writing of this republication and (b) a credit line attributes the original publication to *Academic Medicine*.

## AUTHOR(S) POSTING OF ARTICLES TO AN INSTITUTIONAL REPOSITORY

*Academic Medicine* will permit the author(s) to deposit for display a “post-print” (the final manuscript after peer-review and acceptance for publication but prior to the publisher’s copyediting, design, formatting, and other services) 12 months after publication of the final article on his/her personal web site, university’s institutional repository or employer’s intranet, subject to the following:

- a. You may only deposit the post-print.
- b. You may not update the post-print text or replace it with a proof or with the final published version.
- c. You may not include the post-print or any other version of the article in any commercial site or in any repository owned or operated by any third party. For authors of articles based on research funded by NIH, Wellcome Trust, HHMI, or other funding agency, see below for the services that LWW will provide on your behalf to comply with “Public Access Policy” guidelines.
- d. You may not display the post-print until twelve months after publication of the final article.
- e. You must attach the following notice to the post-print: “This is a non-final version of an article published in final form in (provide complete journal citation)”.
- f. You shall provide a link in the post-print to the *Academic Medicine*’s website.

## “PUBLIC ACCESS POLICY” FUNDING DISCLOSURE

Please disclose below if you have received funding for research on which your article is based from any of the following organizations:

- National Institutes of Health (NIH)
- Howard Hughes Medical Institute (HHMI)
- Research Councils UK (RCUK)
- Wellcome Trust
- Other: Please List \_\_\_\_\_

## COMPLIANCE WITH NIH AND OTHER RESEARCH FUNDING AGENCY ACCESSIBILITY REQUIREMENTS

A number of research funding agencies now require or request authors to submit the post-print (the article after peer review and acceptance but not the final published article) to a repository that is accessible online by all without charge. Within medical research, three funding agencies in particular have announced such policies:

- The U.S. National Institutes of Health (NIH) requires authors to deposit post-prints based on NIH-funded research in its repository PubMed Central (PMC) within twelve months after publication of the final article in the journal.
- The Howard Hughes Medical Institute (HHMI) requires as a condition of research grants, deposit in PMC, but in its case within six months after publication of the final article.
- The Wellcome Trust requires, as a condition of research grants, deposit in UK PubMed Central within six months after publication of the final article.

As a service to our authors, LWW will identify to National Library of Medicine (NLM) articles that require deposit. This Copyright Transfer Agreement provides the mechanism for identifying such articles. LWW will transmit the post-print of an article based on research funded in whole or in part by one or more of these three agencies to Pub Med Central.

Upon NIH request, it remains the legal responsibility of the author(s) to confirm with NIH the provenance of their manuscript for purposes of deposit.

Author(s) will not alter the post-print already transmitted to NIH.

Author(s) will not authorize the display of the post-print prior to:

- (a) 12 months following publication of the final article, in the case of NIH,
- (b) 6 months following publication of the final article, in the case of Wellcome Trust and HHMI

**RIDER 4A**  
**Compliance with RCUK and Wellcome Trust Open**  
**Access Policies**

Both the Research Councils UK (RCUK) and the Wellcome Trust have adopted policies regarding Open Access to articles that have been funded by grants from the RCUK or the Wellcome Trust. If either “Wellcome Trust” or “Research Councils UK (RCUK)” has been selected above, and the authors of the applicable article choose to have the article published as an open access publication, the following policies will apply:

- If the article is to be published pursuant to the “Gold” route of Open Access, both the RCUK and the Wellcome Trust require that LWW make the article freely available immediately pursuant to the Attribution 3.0 Creative Commons License, currently found at <http://creativecommons.org/licenses/by/3.0/legalcode> (the “CC BY License”). The CC BY License is the most accommodating of the Creative Commons licenses and allows others to distribute, remix, tweak, and build upon the article, even commercially, as long as they credit the authors for the original creation.
- If the article is to be published pursuant to the “Green” route of Open Access, both the RCUK and the Wellcome Trust require that LWW make the article freely available within six months pursuant to the Attribution-NonCommercial 3.0 Creative Commons License, currently found at <http://creativecommons.org/licenses/by-nc/3.0/legalcode> (the “CC BY-NC License”). The CC BY-NC License allows others to remix, tweak, and build upon the article non-commercially, and although their new works must also acknowledge the authors for the original creation and be non-commercial, they don’t have to license their derivative works on the same terms.

As a service to our authors, LWW will identify to National Library of Medicine (NLM) articles that require deposit pursuant to the RCUK and Wellcome Trust policies described in this section. This Copyright Transfer Agreement provides the mechanism for identifying such articles.

LWW will transmit the final peer-reviewed manuscript of an article based on research funded in whole or in part by either RCUK or the Wellcome Trust to Pub Med Central.

Upon NIH request, it remains the legal responsibility of the author to confirm with NIH the provenance of his/her manuscript for purposes of deposit. Author will not deposit articles him/herself. Author will not alter the final peer-reviewed manuscript already transmitted to NIH.

With respect to the “Green” route of Open Access, author will not authorize the display of the final peer-reviewed manuscript prior to 6 months following publication of the final article.

Authors of articles that have been funded from grants from the RCUK or the Wellcome Trust are required to sign the LWW Open Access License Agreement prior to publication of the applicable article. Please contact the Editorial Office of the applicable Journal to receive the Open Access License Agreement that is to be signed in connection with the publication of the article.

Please upload one copyright form per author with  
your revised manuscript.
