

The Royal Society of Medicine

New therapies to manage cardiovascular risk and disease

This webinar will provide an update on pharmacotherapy treatments that have recently become available, or are in late-stage development for the prevention and treatment of cardiovascular disease. The assessment of cardiovascular risk and optimal application of these therapies will be discussed as well.

The online lectures will be clinically focused with the aim of educating healthcare professionals about these new therapies in the prevention and treatment of cardiovascular disease.

Topics to be covered:

- New pharmacotherapy treatments for the prevention and treatment of cardiovascular disease
- The use of new pharmacotherapy treatments in the context of current treatment strategies and where they will fit into existing clinical guidelines
- Improve matching of therapy to individual cardiovascular risk profiles according to the principles of precision medicine
