Impact of thymosin α1 as an immunomodulatory therapy on long-term survival of non-small cell lung cancer patients after R0 resection: a propensity score-matched analysis

DOI: 10.1097/CM9.0000000000001819

In the article “Impact of thymosin α1 as an immunomodulatory therapy on long-term survival of non-small cell lung cancer patients after R0 resection: a propensity score-matched analysis” which appeared in vol.134, issue 22, pages 2700–2709 of Chinese Medical Journal,[1] the hazard ratio (HR) values in Figure 3A should be corrected as “HR (12–24 months vs. less than 12 months): 0.463 (95%CI: 0.341–0.683, P = 0.0001); HR (more than 24 months vs. less than 12 months): 0.284 (95%CI: 0.197–0.409, P < 0.0001); HR (12–24 months vs. more than 24 months): 1.632 (95%CI: 1.056–2.522, P = 0.0275).” The HR values in Figure 3B should be corrected as “HR (12–24 months vs. less than 12 months): 0.357 (95%CI: 0.216–0.588, P < 0.0001); HR (more than 24 months vs. less than 12 months): 0.171 (95%CI: 0.107–0.272, P < 0.0001); HR (12–24 months vs. more than 24 months): 2.090 (95%CI: 1.175–3.717, P = 0.0121).” The original results and conclusions are not affected. Figure 3 is corrected as below.

Reference
Dear Author,

During the preparation of your manuscript for typesetting, some queries have arisen. These are listed below. Please check your typeset proof carefully and mark any corrections in the margin as neatly as possible or compile them as a separate list. This form should then be returned with your marked proof/list of corrections to the Production Editor.

**QUERIES: to be answered by AUTHOR/EDITOR?**
