Comparing trends in cancer mortality in China and the USA

Among males
- Liver
- Stomach
- Esophageal
- Colon
- Lung

Among females
- Liver
- Stomach
- Breast
- Prostate

Comparing trends in cancer incidence in China and the USA

Cancer profiles in China and the USA are converging with time

Potential solutions to reduce cancer disease burden in China

- Adoption of indoor smoking policies and smoking control
- Vaccination of young girls against human papilloma virus
- Provision of cancer screening and early treatment services for high-risk groups
- Promotion of healthy population aging strategies
- Encouragement of cancer research

Identifying common cancer trends between countries could help formulate strategies to reduce disease burden
