

CONTEMPORARY NEUROSURGERY

A MONTHLY PUBLICATION FOR CLINICAL NEUROSURGICAL
CONTINUING MEDICAL EDUCATION

Editor-in-Chief Announcement

August 1, 2022

For over 20 years, *Contemporary Neurosurgery* has grown to be a leading modern newsletter under the leadership of Editor-in-Chief, Ali F. Krisht, M.D., FACS. Dr. Krisht has distinguished himself as a world-renowned cerebrovascular, pituitary tumor, and skull base, neurosurgeon, and esteemed academician. He has served on editorial boards of several medical journals and has been Editor-in-Chief of *Contemporary Neurosurgery* since 1999. The remarkable progress that has been made to advance the newsletter to where it is today is a direct result of his leadership and the team he assembled. I am humbled to announce that I have accepted the position as Editor-in-Chief of *Contemporary Neurosurgery* beginning August 2022.

Though this change in leadership will bring about new features of the newsletter, the mission of *Contemporary Neurosurgery* will remain the same: to provide an in-depth review of modern techniques in neurosurgery through a modern neurosurgical education program. The strengths that helped grow this publication will continue to guide our team as we implement changes. Beginning in 2023, we will convert to a monthly release schedule. I will rely on the collective expertise of a new editorial board consisting of a multidisciplinary team of leaders in each of their respective fields to bring fresh ideas and build on past strengths. They have each selected a theme that we are excited to share with the *Contemporary Neurosurgery* readership. Additionally, we hope to add some new multimedia features to the journal through the use of digital art, surgical videos, and augmented/virtual reality in the near future.

As the new Editor-in-Chief, I am open to suggestions throughout the course of my position. I value your ideas and feedback, and invite you to reach out to me through the journal email: contemporaryneurosurgery@gmail.com.

With gratitude,

Bernard R. Bendok, M.D.
