

There is a risk of cardiopulmonary complications during and following COVID-19, and individuals with preexisting conditions are at elevated risk for severe complications. This may be due to numerous pathological changes associated with COVID-19 coupled with pre-existing conditions. These issues and others warrant the production and dissemination of scholarly work to better understand the cardiopulmonary implications of COVID-19.

As the official journal of The Cardiopulmonary Section of the American Physical Therapy Association, *Cardiopulmonary Physical Therapy Journal* seeks submission of manuscripts related to the physical therapy management of patients with COVID-19. The journal will accept original research reports, systematic reviews, clinical perspectives and case studies,

Manuscripts submitted for this special call will receive fast track peer review. To indicate that your work is for this special call for COVID-19 manuscripts please note the topic in the cover letter. Accepted manuscripts will be published online ahead of print and made publicly available.

Please submit your work here: <https://www.editorialmanager.com/cptj/default.aspx>
