Evolution of Cytoreductive Surgery and Hyperthermic Intraperitoneal Chemotherapy for Colorectal Peritoneal Metastases

8-Year Single-Institutional Experience

doi: 10.1097/DCR.0000000000001456
Original contributions: Colorectal Cancer

CORRECTION

The concluding sentence of the abstract contains an error that was introduced during production when page proof corrections were being made.

The correct sentence should read: "Cytoreductive surgery and hyperthermic intraperitoneal chemotherapy for isolated low-volume colorectal peritoneal metastases is safe and effective, with low morbidity."

An erratum is currently in process.
