Patients with hip or knee osteoarthritis have an increased risk of falls and subsequent fractures. Total joint arthroplasty (TJA) improve gait, strength, and balance in the long term in patients with osteoarthritis. Driesman et al. (2020) DOI: 10.5435/JAAOS-D-19-00541

Total joint arthroplasty Is Associated With a Decreased Risk of Traumatic Falls: An Analysis of 499,094 Cases

Driesman et al. (2020) DOI: 10.5435/JAAOS-D-19-00541

Total joint arthroplasty reduces the long term risk of traumatic falls in elderly patients with hip or knee osteoarthritis.
