Rigorous, dependable research has always been at the core of the mission of the American Urological Association to help urologists globally better serve their patients and make the discoveries that will cure urologic diseases in the future.

Offering 3 scientific research journals that cover the breadth of urological disease and practice, the AUA serves clinicians and investigators by providing online access to full-text articles for members and Open Access options for authors.
Immediate Impact + Enduring Foundational

As a world leader in peer-reviewed urological research, we’re not simply publishing findings—we’re publishing research with immediate impact and enduring foundational value.

World-renowned for research that commands influence and respect while serving science and society, the 3 AUA Journals advance the rate of innovation in the field and the application of the latest science into clinical practice.

Trusted Evidence

From Discovery to Practice

For Career Advancement
Understand Your Submission Path With the AUA Journals

STEP 1
Submit Your Article One Time to the AUA Journal of Your Choice
• Confirm your research fits the scope of the journal.
• Follow the Author Instructions.
• Make a good first impression with the article title and abstract.

STEP 2
Your Submission Will Be Considered for All 3 Prestigious AUA Journals
• When a manuscript is submitted to an AUA Journal, it may be referred to another AUA Journal before or after peer review.

STEP 3
Receive Your Decision Letter
• Revise if indicated in your decision letter.
• If rejected, you may be referred to another AUA Journal. Good news!
• This saves you time – just confirm your interest in submitting to the journal, and revise if requested.

Aims & Scope

The Journal of Urology® covers the wide scope of urology, including pediatric urology, urologic oncology (cancer), renal transplantation, male infertility, calculi (urinary tract stones), female urology (urinary incontinence and pelvic outlet relaxation disorders), and neuourology (voiding disorders, urodynamic evaluation of patients and erectile dysfunction or impotence).

This premier journal presents clinical investigative articles, survey articles summarizing the most important urology literature worldwide, and practice-oriented reports on significant clinical observations.
JU Open Plus is an international, peer-reviewed, open access publication providing authors with continuous publication of high-quality research in all areas of urology.

Aims & Scope

Article types accepted for submission include full-length original research articles, narrative and systematic reviews, letters to the editor, editorials, video articles, research communications, commentaries, and case reports/case series.

JU Open Plus offers a nimble, streamlined decision process and wide dissemination of scientifically rigorous research, thereby advancing the specialty of urology.
