Nursing Research is pleased to announce the publication of a special issue in March/April 2019 on Precision Health. Guest editor Susan G. Dorsey, PhD, RN, FAAN Professor and Chair, Department of Pain and Translational Symptom Science at the University of Maryland Baltimore, and Nursing Research editor, Rita Pickler, invite papers addressing topics related to Precision Health. Precision Health includes approaches to individualizing prevention and healthcare management using multi-omics (e.g., genetics, transcriptomics, metabolomics, epigenetics, microbiome, etc.) and other physiological, psychological, imaging, environmental, and ethical factors for persons, families, and communities. Full-length, original papers or briefs reporting pilot study results or innovative methods in precision health are welcome. Implications for nursing and healthcare research and practice should be addressed.

Queries to the editor are welcome at pickler.1@osu.edu.

The cover letter should note that the paper is being submitted in response to the Call for Precision Health.

Authors should consult the Guide for Authors at https://journals.lww.com/nursingresearchonline/Pages/informationforauthors.aspxthere.
