The Editor of Orthopaedic Nursing wants to hear from you!

Are you currently working on evidence-based research or have an interesting case study that would benefit other nurse professionals? Or do you have an idea that would fit well in one of our columns: Ethics, Pathophysiology, Pharmacology, Resource Column or What’s Wrong With This Picture?

ON is seeking original manuscripts that present new research, clinical reviews, case studies and professional development information relevant to the practice of orthopaedic nursing.

Topics may include but are not limited to:

- Musculoskeletal health
- Osteoarthritis
- Best practices for arthroplasty care
- Pediatric orthopaedic conditions
- Ambulatory surgical care
- Pain management
- Infection control
- Interesting orthopaedic case studies

Articles undergo a process of double-blind peer review. Final selections represent the broad scope of the orthopaedic nursing specialty and draw on the expertise of all healthcare providers who participate in orthopaedic care.
