

Job Description for Website Digital Editor Journal of Clinical Psychopharmacology

The Digital Editor candidate should be a tech-savvy clinician in psychopharmacology. The candidate must have a strong interest in technology and be highly adept in the use of social media, specifically with Twitter. The candidate should be entrepreneurial in spirit and be able to cast a larger vision for future growth and development.

Candidates should be active in clinical or health service psychology. They should be professionally engaged via activities such as conference attendance. The candidate should be familiar with advances in the specialty and should understand issues surrounding the user experience and accessibility in the electronic dissemination of information. The right candidate will be able to work independently and take ownership of the digital content development of the journal.

Primary Responsibilities:

Working with the editor-in-chief, develop a digital strategy that may include Twitter, commissioned content, podcasts, videos, maximizing journal content, updating collections and journal clubs.

The anticipated workload would be 2 to 3 hours per week and would include a modest annual stipend. The growth potential of this position is significant and, in part, depends upon the ambition and leadership of the successful candidate.

Potential candidates should consider the following:

- What is the purpose of a Digital Editor for a scientific publication?
- What unique assets could you bring to the position?
- What is your vision for the future of the online and social media presence of the Journal?
- What features could be incorporated into the Website that would offer novel learning and interactive opportunities for readers?

To apply for this position, please send a cover letter stating your interest and your CV to the publisher, Marianne.kerr@wolterskluwer.com. Please enter JCP Digital Editor in the subject line. The deadline for applications is December 15th, 2020.
