

## Special Theme Issue Call for Papers

SHOCK® will publish a Special Issue in 2023 that addresses the topic: ***Immune cell functions and reprogramming in sepsis, trauma and burns***. This Special Issue will potentially include reviews and original research (both basic and clinical).

Papers must be submitted by August 31, 2022 through Editorial Manager (<https://www.editorialmanager.com/shock>) to be included in the Special Issue. All authors should follow the Instructions for Authors when submitting a manuscript (<https://edmgr.ovid.com/shk/accounts/ifaauth.htm>).

The initial submission of the manuscript will use the Simple Submit process, where manuscripts may be submitted in Word or Acrobat for initial review.

The submission fee will be waived for all papers submitted to the special issue. Please note that submission fees are routinely waived for Shock Society members. For more information on joining the Shock Society, please see <https://www.shocksociety.org/>.

Please consider submitting your paper to this Special Issue of SHOCK®!
