

CALL FOR PAPERS

Techniques in Shoulder & Elbow Surgery

provides the latest orthopaedic procedures as they are developed and used by top orthopaedic surgeons. Readers are invited to step into the operating room with this quarterly publication that supplies step-by-step details of exciting and advanced techniques.

The content is technique-oriented and includes invited commentary and reviews. **Techniques in Shoulder & Elbow Surgery** details the evolution of and rationale for the procedures, identifies the pitfalls and possible complications, and provides invaluable tips for improving surgical results. The new Video Techniques section offers readers the combination of a brief referenced article with a high-quality video.

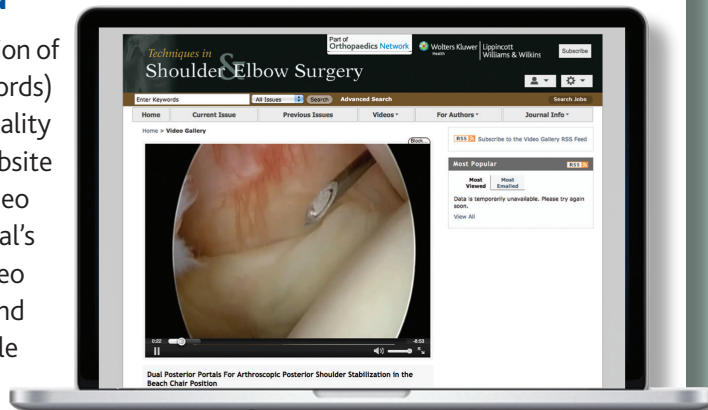

You are invited to submit your best work in the following categories:

► CLASSIC TECHNIQUES

Provide a description of the classic “How-To”. Address a common condition and complication encountered by orthopedic surgeons and provide your step-by-step procedure to correct the issue.

► VIDEO TECHNIQUES SECTION

The **Video Techniques** article is a combination of a short print manuscript (less than 1000 words) accompanied by a 5- to 10-minute high-quality video, which will be posted on the TSES website (www.shoulderelbowsurgery.com). The video and manuscript will be subject to the Journal’s normal peer review process. Only MP4 video format will be accepted. Full manuscript and video guidelines for this section are available at <http://tses.edmgr.com>.

For complete author instructions and to submit your manuscript to **Techniques in Shoulder & Elbow Surgery**, visit <http://www.editorialmanager.com/tses/>.
