Marketing in Audiology: Multi-layered strategy needed to reach every stratum of patients
By Valerie Laberta
Audiologists are facing increasing competition in pricing and technology from both big box retail stores and cutting-edge startups. Adopting the right marketing strategies might be audiologists’ saving grace. Read More.

Trial of an Alternate Hearing Aid Delivery Model
By Larry Humes, PhD, & Sumitrajit Dhar, PhD
The National Institute on Deafness and Other Communication Disorders (NIDCD) working group resulted in the first randomized controlled trial that compared the hearing aid benefits in older adults of the conventional and alternate service-delivery models. Read More.

Why is Hearing Loss a Public Health Concern?
By Kelly L. Tremblay, PhD
Hearing loss affects an increasing portion of the population and care remains out of reach to many. Looking at hearing loss as a public health issue will change how the government and hearing aid industry address problems in hearing health care. Read More.

CDC Research on Non-Occupational NIHL
By Yulia Carroll, MD, PhD, & John Eichwald, MA
Recent research conducted by the CDC show that troubled hearing is more common than we thought, and most people are not aware of how everyday sounds could result in hearing loss. Read More.

Help Patients "Connect the Dots"
By Judy Curtin, AuD
Patients are often aware of having a hearing problem, but they don’t want to accept the reality. Dr. Curtin provides a blueprint of how to support and guide patients from discovery to problem-solving. Read More.

Hearing Wellness for Musicians
Here's a patient handout with useful tips on how musicians could protect their hearing without putting their careers and their ears in danger. Read More.

**LATEST COLUMNS**

**Editorial: Choosing the Right Office Management System**
By Kenneth E. Smith, PhD

Office management systems can either work for you or against you. Dr. Smith shares tips on how to pick the right one that will make your life easier. Read More.

**Journal Club: Is Auditory Synaptopathy a Result of Drug-Induced Hearing Loss?**
By Peter S. Steyger, PhD

Researchers have long puzzled over the fact that there are still elevated auditory thresholds in the cochlea where almost all sensory cells have survived ototoxic treatment. A new study sheds light on this apparent lack of correlation between the two. Read More.

**Clinical Consultation: Symptom: Conductive Hearing Loss**
By Hamid R. Djalilian, MD

A 32-year-old man has right-sided hearing loss and has had two episodes of meningitis in the past year. Exam shows serous-like fluid in the right ear. What's the diagnosis? Read More.

**TOT 10: 10 Lessons From Our First 10 Years**
By Joanna T. Smith, MS, & Jace Wolfe, PhD

Leaders of Hearts for Hearing, an organization that helps people with hearing loss in Oklahoma City, share insights into their success in the wake of the group's 10th anniversary. Read More.

**Hearing Matters: Understanding Labyrinthine Concussion**
By Dennis Colucci, AuD, MA

The elderly is at greater risk from falling and, as a result, labyrinthine concussion. Dr. Colucci discusses the causes, symptoms, and management of this damage to the inner ear. Read More.
