[The Noncompliance Challenge: How to Improve Hearing Aid Use](#)

By *Gina Shaw*

Hearing aid noncompliance is a continuing challenge for audiologists. While it's clear that hearing aids are not being effectively used by a substantial number of patients, research has been less clear on what can be done to change that behavior. [Read More.](#)

[Listening Effort in Age-Related Hearing Loss](#)

By *Jonathan E. Peelle, PhD, & Arthur Wingfield, DPhil*

Listening effort has emerged as a new outcome measure to capture listener behaviors and experiences that are not accounted for by simple intelligibility measures. However, it is unclear how this metric should be defined or measured. [Read More.](#)

[Study Abroad and Student Learning: Tales from Zambia](#)

By *Christi Masters, MS, & Lata A. Krishnan, PhD*

Organizers of Purdue University's Speech, Language, and Hearing Sciences study abroad program in Zambia share their insights into the planning and execution involved in teaching students about hearing health care in an international setting. [Read More.](#)

[Preliminary Observations of Self-Fitted Hearing Aid Outcomes](#)

By *Gitte Keidser, PhD, & Elizabeth Convery*

The authors set out to study the performance and benefits of self-fitted hearing aids to substantiate recommendations made for the approachability and effectiveness of these devices by the President's Council of Advisors on Science and Technology report in 2015. [Read More.](#)

LATEST COLUMNS

[Editorial: Hidden Hearing Loss: A Clinician's Perspective](#)

By *Harrison W. Lin, MD*

Growing scientific evidence suggests that hidden hearing loss plays a role in many troublesome auditory symptoms. [Read More.](#)

[Journal Club: Objective Measures in Children with Auditory Brainstem Implants](#)

By Shuman He, PhD

Many pediatric ABI users have multiple disabilities or medical conditions limiting their abilities to provide reliable behavioral responses. Dr. He discusses two objective measures that could address this challenge. [Read More.](#)

[Clinical Consultation: Symptom: Mixed Hearing Loss](#)

By Hamid R. Djalilian, MD

A 58-year-old woman comes in with a five-year history of pulsatile tinnitus in the right ear. She describes hearing her heartbeat in the right ear. What's the diagnosis? [Read More.](#)

[Tot 10: Auditory Brain Development in Children with Hearing Loss – Part 2](#)

By Jace Wolfe, PhD, & Joanna Smith, MS

This is the conclusion of a two-part article on the effects of hearing loss and audiological intervention on auditory brain development in children. [Read More.](#)

[Hearing Matters: Newborn Hearing Screening 2.0](#)

By Nina Kraus, PhD, & Travis White-Schwoch

Audiologists can test not only whether or not sound gets in but also how well sound is processed by the brain when screening infants for hearing loss. The second measure would provide another opportunity for early intervention to prevent language and learning problems. [Read More.](#)
